paulkurtperocillo@gmail.com | 09916531024 | Cebu

Full-Stack Software Engineer with over 3 years of experience designing, developing, and deploying modern web and mobile applications using JavaScript and Python. Experienced in API design and delivering scalable, efficient solutions. Passionate about bringing ideas to life, from architecting complex solutions to supporting startups in their growth, continuously improving through hands-on practice and a strong drive to learn.

## Experience

---

### Freelance Full-Stack Developer,

*January 2023 - Present*

As a Full-Stack Software Engineer, I design, develop, and deploy web and mobile applications using JavaScript and Python, including API architecture, database design, and front-end integration. I deliver end-to-end, production-ready solutions for startups and clients, building responsive interfaces, implementing server-side logic, and ensuring scalable, maintainable code, while continuously enhancing my skills through hands-on development and independent learning.

## Education

---

### Cebu Technological University – Argao Campus

*Bachelor of Science in Information Technology (BSIT), August 2023 - Present*

## Skills

---

*AWS, JavaScript, React, Node.js, Git, Agile, Python, PostgreSQL*

## Projects

---

### SideLineAU – Freelance Full-Stack Project

Developed a platform connecting clients with side hustlers in Australia. I designed and implemented front-end interfaces, built back-end APIs, and structured the database to ensure scalable and maintainable operations. The project includes responsive design, resulting in a production-ready platform that brings ideas to life.

### Personal Portfolio Website

Created a modern, interactive portfolio website to showcase projects and technical skills. I implemented dynamic components, responsive layouts, and optimized performance using JavaScript, React, and Vite, enhancing user experience with smooth navigation and visual engagement. The project demonstrates my ability to design and deploy professional-grade web applications independently.

### Cebu Earthquake Information Site

Developed a web application providing real-time earthquake updates and safety information for Cebu residents. I implemented API integration, dynamic data display, and responsive UI, ensuring accurate and timely information delivery. The project demonstrates my ability to create practical, data-driven applications that address community needs.
